

Ledger Settlements in D365 Finance and Operations

In **Dynamics 365 Finance and Operations (D365 F&O)**, **Ledger settlement** is the process of **matching or settling debit and credit transactions** in the **general ledger (GL)**. It is mostly used for **clearing accounts, accruals, suspense accounts, and intercompany accounts**, to ensure that transactions balance out and that the account balances are accurate.

Enabling Ledger Settlements

Navigate to General Ledger Module > Setup > General Ledger Parameters > Ledger Settlements

Case 1:

A simple case of manually settling transactions

Let us perform a Debit and credit transaction on this account and see the impact of manually settling the same

Budget check results

Budget check not performed

Navigate to General Ledger > Periodic Tasks > Ledger Settlements

Select the desired date range "From Date" and "To Date" — to retrieve all ledger account transactions that require settlement within the specified period.

Use the "Display transactions" button in conjunction with the "Status" filter set to "Not Settled" to display all outstanding (unsettled) transactions.

	Not settled			021533	GNJL0010...	9/18/2025	132100--		USD	-100.00	100.00	Ledger journal	General j

To perform the settlement, manually select the relevant transactions and click "**Settle marked transactions**" as illustrated below.

The Transactions are now settled.

Advanced Ledger Settlement options

Awareness between Ledger Settlement and Year-end close

Enabling this setting makes two significant changes that affect **ledger settlement** and **year-end close**:

1. Settled transactions are excluded from Opening balances

- Only **unsettled** transactions are carried forward into the new fiscal year.
- This means **foreign currency revaluation** will apply only to **unsettled** balances.

- Because settled transactions are excluded, you **cannot settle across accounts or fiscal years**.

2. Option to keep detailed transaction info in Opening balances

- You can choose to **retain transaction-level details** for unsettled balance sheet accounts.
- The system will **copy each unsettled transaction** into the new year as part of the Opening balance.
- These copies include the **original account, amount, and description**.

Based on the available parameters for ledger settlements, I have further categorized the process into scenarios, considering the various combinations of parameter settings, transaction values, and currencies.

Number	Cases	Subcase 1.1	Subcase 1.1.1	Subcase 1.1.1.1	Subcase 1.1.1.1.1	Subcase 1.1.1.1.1.1	Subcase 1.1.1.1.1.1.1
1	Only Ledger Settlements are enabled	Transactions are not settled	Advanced Awareness is No				
2.1	Only Ledger Settlements are enabled	Transactions are not settled	Advanced Awareness is Yes	Keep Detail-No			
2.2	Only Ledger Settlements are enabled	Transactions are not settled	Advanced Awareness is No	Keep Detail-Yes

☒ 132100	Prepaid Insurance	Asset	☒ Yes	Debit

The key difference in this case is that, although the +100 USD and -100 USD transactions offset each other to a net balance of zero, they were not settled. As a result, since a detailed opening balance is being carried forward, both transactions will also be brought forward individually.

The output remains the same as previously observed, as only unsettled transactions are carried forward into the new fiscal year. If there had been transactions with equal debit and

credit amounts, for example, a USD 100 debit and a USD 100 credit—that remained unsettled, they would have been included in the opening balance and reflected in the trial balance.

Let us attempt to run the year-end close process. During validation, a warning is displayed indicating that ledger settlements have caused an out-of-balance error, which prevents the year-end closure from completing successfully with the current configuration.

Reason for this setting:

In my understanding, this option should be enabled (set to "Yes") for all ledger accounts, except for those that will be revalued through the General Ledger, Accounts Payable, or Accounts Receivable revaluation processes.

If the batch job is executed forcefully, it would also fail for the same reason

Case 6.2:

Ledger settlements are enabled, settlements are done

Awareness is set to Yes

Keep details is Yes

Enable post currency realized gains/losses for ledger settlements is Yes

Calculating realized gains and losses is Yes

Transaction currency balances but difference in accounting and reporting currency

Transaction set considered for this case

Account	Date	Dr	Cr	Currency	USD Value
132100	19/09/2025	100		INR	1
132100	20/09/2025		100	INR	2

Quick additional setup

Set up number sequences for General ledger documents and tasks

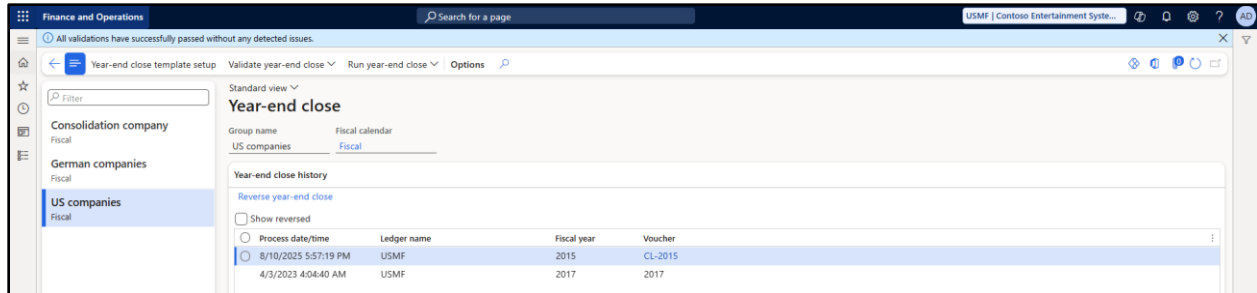

Reference	Number sequence	Description
Sales tax payment	Tax_11	Unique key for vouchers, used when posting sales tax settlement
Tax communication ID		Unique key for identification of tax communication. The key is used for creating Italian yearly tax communication report.
Annual sales list ID		Identification of the Belgian annual sales list.
Advanced ledger entry	Gene_175	Unique key for advanced ledger entries that is used when processing an advanced ledger entry
Advanced ledger entry vo...	Gene_176	Unique key for advanced ledger entry vouchers that is used when processing an advanced ledger entry voucher
Withholding tax payment ...	Tax_24	Unique key for vouchers, used when posting sales tax settlement
Upload journal number	Gene_297	Upload journal number
Message	Tax_104	Unique key for message
Message item	Tax_130	Unique key for message item
Revenue reallocation ID	Acco_16412	Used to default the ID assigned to the multiple sales orders that were reallocated.
Ledge settlements	LSECT	Unique key for vouchers, used when posting foreign currency adjustments during the ledger settlement process

The settlement is now complete, with vouchers automatically posted to account for realized gains (in our case) and losses.

Let us check if the Year end close is possible or not.

The year-end close is completed successfully, with no opening balance transactions carried forward since all transactions were fully settled.

Case 7:

Ledger settlements are enabled, settlements are done

Awareness is set to Yes

Keep details is Yes

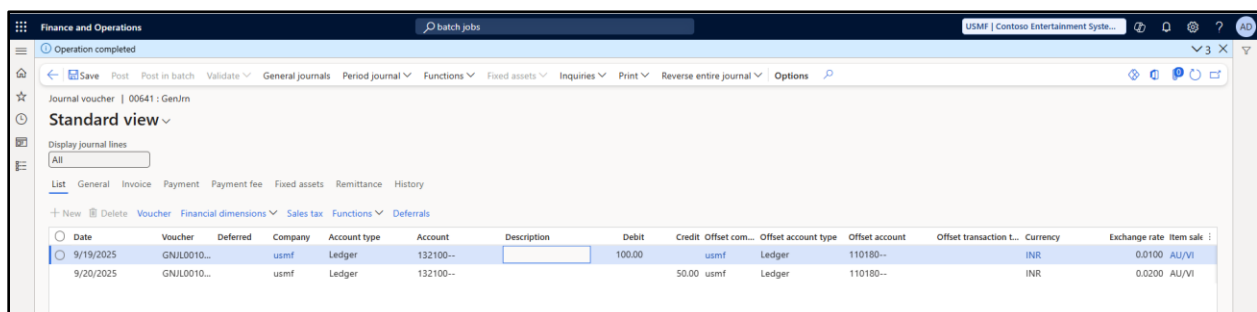

Enable post currency realized gains/losses for ledger settlements is Yes

Calculating realized gains and losses is No.

Transaction currency differs but balances accounting and reporting currency. Partial settlement is NO

Transaction set considered for this case

Account	Date	Dr	Cr	Currency	USD Value
132100	19/09/2025	100		INR	1
132100	20/09/2025		50	INR	1

The error message indicates that, because partial settlements are disabled, these transactions do not match in the transaction currency, even though they balance in both accounting and reporting currencies.

Although the amounts in accounting and reporting currencies balance out, the transaction currency does not. As a result, the line with the higher balance (highlighted in red) is considered partially settled—even though it is fully settled in accounting and reporting currencies.

Additional point to note:

Even though the accounting and reporting currencies of these transactions balance, the remaining balance in the transaction currency causes a corresponding remaining balance in accounting currency (calculated as transaction amount × accounting exchange rate) and reporting currency (transaction amount × reporting exchange rate).

Why does this happen?

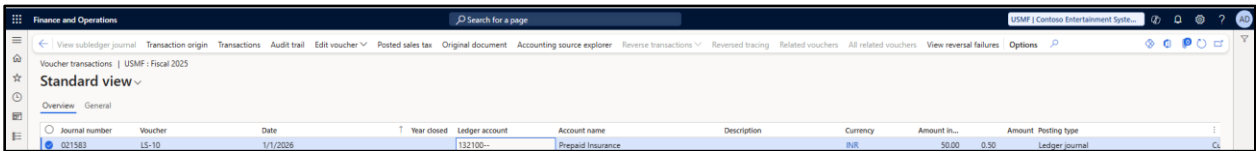

INR 50 was settled from both transactions together, with the corresponding exchange rate gains or losses posted. However, the remaining balance of INR 50 on the partially settled line is carried forward. Therefore, despite the initial appearance that accounting and reporting amounts are balanced, there remains a balance in both accounting and reporting currencies due to the unsettled portion of the transaction currency.

The screenshot shows the 'Ledger settlements history' table in SAP Finance and Operations. The table lists four transactions for the date 9/20/2025, all with a ledger account of 132100--. The first transaction (journal 021579, voucher 021579) is highlighted in red and shows a settled amount of 50.00 INR and a settled amount of 0.50 INR. The second transaction (journal 021580, voucher 021580) shows a settled amount of -50.00 INR and a settled amount of -1.00 INR. The third transaction (journal 021581, voucher 021581) shows a settled amount of 0.00 INR and a settled amount of 0.50 INR. The fourth transaction (journal 021582, voucher 021582) shows a settled amount of 0.00 INR and a settled amount of 0.50 INR. The table columns include: Marked, Settlement date, Date settled, Automation rule, Date processed, Journal no., Voucher, Date, Ledger account, Description, Currency, Settled am., Settled am., Settled am., Posting type, Transaction type, and Document.

Marked	Settlement date	Date settled	Automation rule	Date processed	Journal no.	Voucher	Date	Ledger account	Description	Currency	Settled am.	Settled am.	Settled am.	Posting type	Transaction type	Document

Let us perform the year-end close process and observe its impact. Upon completion, only the partially settled (as in our case) and unsettled transactions are carried forward as the opening balance.

The screenshot shows the 'Voucher transactions' table in SAP Finance and Operations. The table lists one transaction for the date 1/1/2026, with a ledger account of 132100-- and a description of 'Prepaid insurance'. The transaction is highlighted in blue. The table columns include: Journal number, Voucher, Date, Year closed, Ledger account, Account name, Description, Currency, Amount INR, Amount INR, Amount, Posting type, and Document.

Journal number	Voucher	Date	Year closed	Ledger account	Account name	Description	Currency	Amount INR	Amount INR	Amount	Posting type	Document
021583	15-10	1/1/2026		132100--	Prepaid insurance		INR	50.00	0.50		Ledger journal

300160	Retained Earnings	3,192.65	0.00	0.00	3,192.65

Case 9:

Ledger settlements are enabled, settlements are done

Awareness is set to Yes

Keep details is Yes

Enable post currency realized gains/losses for ledger settlements is Yes

Calculating realized gains and losses is Yes

Partial Settlements are Yes

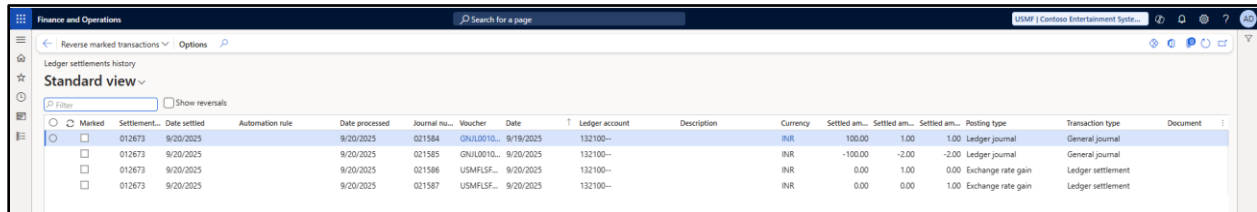

Transaction currency balances but difference in accounting and reporting currency

Transaction set considered for this case

Account	Date	Dr	Cr	Currency	USD Value
132100	19/09/2025	100		INR	1
132100	20/09/2025		100	INR	2

Date	Voucher	Company	Account type	Account	Description	Debit	Credit	Offset com...	Offset account type	Offset account	Offset transaction L...	Currency	Exchange rate	Item sales tax group	Sales tax group	Withholding tax gr...	Refer :
9/19/2025	GNU/0010...	USMF	Ledger	132100--		100.00		USMF	Ledger	110180--		INR	0.0100	AU/V1			
9/20/2025	GNU/0010...	USMF	Ledger	132100--			100.00	USMF	Ledger	110180--		INR	0.0200	AU/V1			

The result is the same as in section 6.1, where the transactions are fully settled and the corresponding gains and losses are posted.

The screenshot shows the 'Ledger settlements history' window in Microsoft Dynamics 365 Finance and Operations. The window is in 'Standard view' and displays a table of settlement transactions. The table includes columns for 'Marked', 'Settlement...', 'Date settled', 'Automation rule', 'Date processed', 'Journal no...', 'Voucher', 'Date', 'Ledger account', 'Description', 'Currency', 'Settled am...', 'Settled am...', 'Settled am...', 'Posting type', 'Transaction type', and 'Document'. The data shows four transactions for the date 9/20/2025, involving ledger accounts 132100 and 132101, with settlement amounts in INR and USD, and transaction types including 'Ledger journal', 'General journal', 'Ledger settlement', and 'Exchange rate gain'.

Marked	Settlement...	Date settled	Automation rule	Date processed	Journal no...	Voucher	Date	Ledger account	Description	Currency	Settled am...	Settled am...	Settled am...	Posting type	Transaction type	Document
☐	012673	9/20/2025		9/20/2025	021584	GNUL0010...	9/19/2025	132100--		INR	100.00	1.00	1.00	Ledger journal	General journal	
☐	012673	9/20/2025		9/20/2025	021585	GNUL0010...	9/20/2025	132100--		INR	-100.00	-2.00	-2.00	Ledger journal	General journal	
☐	012673	9/20/2025		9/20/2025	021586	USMFLSF...	9/20/2025	132100--		INR	0.00	1.00	0.00	Exchange rate gain	Ledger settlement	
☐	012673	9/20/2025		9/20/2025	021587	USMFLSF...	9/20/2025	132100--		INR	0.00	0.00	1.00	Exchange rate gain	Ledger settlement	

As a rule of thumb, we can conclude the following:

- If the transactions balance in the transaction currency, the settlement will always be complete, with any differences in accounting and reporting currencies resulting in the posting of corresponding gains or losses.
- If the transactions balance in accounting and reporting currencies but not in the transaction currency, the line with the higher amount will always be partially settled, leaving a remaining balance in both accounting and reporting currencies, as illustrated in Case 8.
- These outcomes are highly dependent on the parameters configured for ledger settlements.

Review cross year settlements

Cross-year settlements in Microsoft Dynamics 365 Finance and Operations (D365 F&O) refer to settling transactions that span across different fiscal years. If the advanced awareness option is enabled, cross year settlements are not allowed.

Classic Queries

1. A vendor Invoice was raised in September 2025 for which the payment was received in 2026. How do we settle this transaction if the Advanced awareness option is enabled?

Solution: The ledger settlement will be processed in the new fiscal year. The invoice ledger transaction will be carried forward as an opening balance transaction and can subsequently be settled.

From date	To date	Main account	Date interval code	Posting layer	Financial dimension set	Display transactions
1/1/2025	9/30/2025	132100		Current		

Marked	Status	Settlement ...	Date settled	H...	Journal number	Voucher	Date	Ledger account	D...	Currency	Amount L...	Amount	Amount in repo...	Remaining am...	Remaining amount L...	Remaining amount in repo...	Posting type	Transaction type
☐	Not settled				021588	4PM000...	9/20/2025	132100-001-		USD	-1,000.00	1,000.00	-1,000.00	-1,000.00	-1,000.00	-1,000.00	Vendor balance	Vendor

This transaction is carried forward into the new fiscal year as voucher LS-11, as illustrated below, and is subsequently settled with the payment in the new fiscal year, as shown

From date	To date	Main account	Date interval code	Posting layer	Financial dimension set	Display transactions
1/1/2026	9/30/2026	132100		Current		

Marked	Status	Settlement ...	Date settled	H...	Journal number	Voucher	Date	Ledger account	D...	Currency	Amount L...	Amount	Amount in repo...	Remaining am...	Remaining amount L...	Remaining amount in repo...	Posting type	Transaction type
☐	Settled	012674	1/4/2026		021591	LS-11	1/1/2026	132100-001-		USD	-1,000.00	1,000.00	-1,000.00	0.00	0.00	0.00	Vendor balance	Payment
☐	Settled	012674	1/4/2026		021590	APPM001...	1/2/2026	132100-001-		USD	1,000.00	1,000.00	1,000.00	0.00	0.00	0.00	Vendor balance	Payment

Note: Once a transaction is settled in the new fiscal year, the reversal is not possible.

Infotryp of type error for task Reverse year-end close (68720322364)

The year-end close for 1/1/2025 can't be reversed because beginning balance transactions have been ledger settled in fiscal year 1/1/2026. Either reverse the ledger settlement in fiscal year 1/1/2026 before reversing the 1/1/2025 year-end close, or close the fiscal year 1/1/2025 again, but only for new adjusting entries. Reversing the year for adjustments only is accomplished by setting the General ledger parameter "Delete existing year-end entries when re-closing the year" to No.

Batch task failed: The year-end close for 1/1/2025 can't be reversed because beginning balance transactions have been ledger settled in fiscal year 1/1/2026. Either reverse the ledger settlement in fiscal year 1/1/2026 before reversing the 1/1/2025 year-end close, or close the fiscal year 1/1/2025 again, but only for new adjusting entries. Reversing the year for adjustments only is accomplished by setting the General ledger parameter "Delete existing year-end entries when re-closing the year" to No.

2. Can I settle two transactions currency if partial settlement is enabled?

Account	Date	Dr	Cr	Currency	USD Value
132100	20/09/2025	100		INR	2
132100	20/09/2025		10	EUR	20

Upon settling these transactions, the INR transaction will be fully settled, while the partially settled transaction will be carried forward as an opening balance with the remaining balance shown below:

Account	Date	Dr	Cr	Currency	USD Value
132100	20/09/2025		9	EUR	18

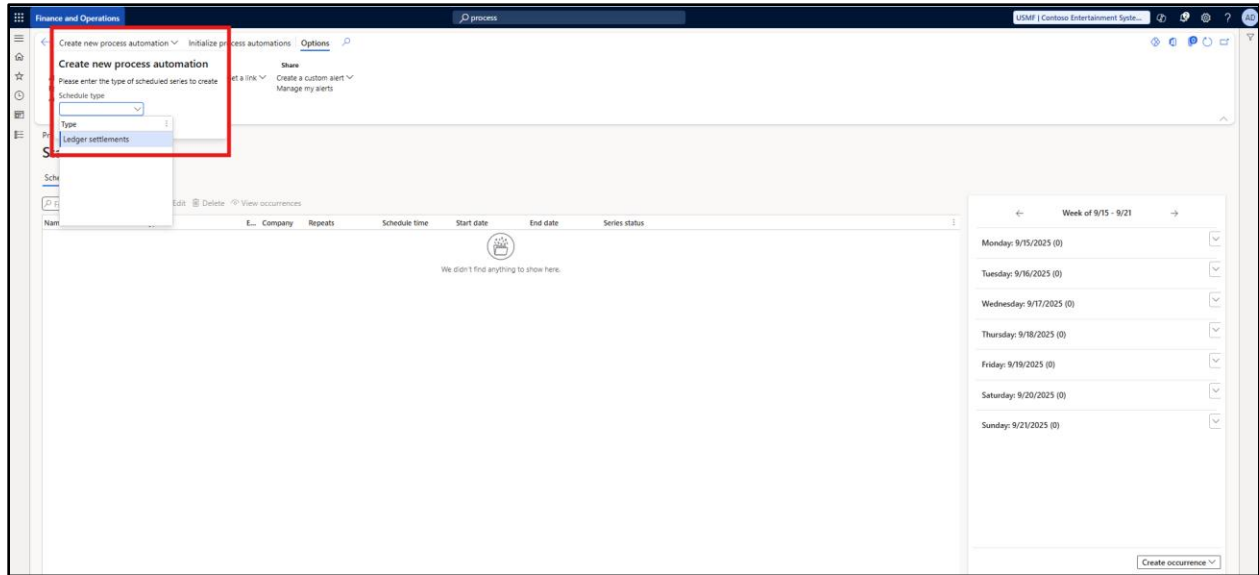

Voucher	Date	Year closed	Ledger account	Account name	Description	Currency	Amount in transac...	Amount	Posting type	Posti
LS-12	1/1/2026		132100-001	Prepaid Insurance		EUR	-9.00	18.00	Ledger journal	Current
LS-12	1/1/2026		132100-001	Prepaid Insurance		USD	-1.00	1.00	Ledger journal	Current
LS-12	1/1/2026		132100-001	Prepaid Insurance		USD	-2.00	2.00	Ledger journal	Current
LS-12	1/1/2026		132100-001	Prepaid Insurance		INR	50.00	0.50	Ledger journal	Current

	☐					Yes

Navigate to General Ledger > Setup > Process automation and create a new process automation for Ledger Settlement as shown below

Define a name for this automation along with its scheduling details, including the start time, start date, end date, and frequency.

Define the criteria: Specify the main account to be used for automatic ledger settlement. Additionally, if any date variances need to be accounted for when matching debits and credits, these should be included in the matching criteria.

Create new process automation

Define the criteria used to automatically match ledger account debits and credits. The Main account and Posting layer options are required match criteria. One debit transaction will be automatically matched to one credit transaction if the transaction's accounting currency amounts are equal.

Main accounts

AVAILABLE MAIN ACCOUNTS: 1 Account name

SELECTED MAIN ACCOUNTS: 132100 Prepaid Insurance

Match Criteria

Date: ☐ No

Allowed date difference:

Main account: ☒ Yes

Posting layer: ☒ Yes

Posting type: ☐ No

Financial dimensions: ☐ No

Back Finish Cancel

Click on Finish. The Process automation for ledger settlement is scheduled as shown below. Based on the schedule, the execution of the same will take place and transactions will get settled.
