

Financial Tags in Microsoft Dynamics 365 Finance and Operations

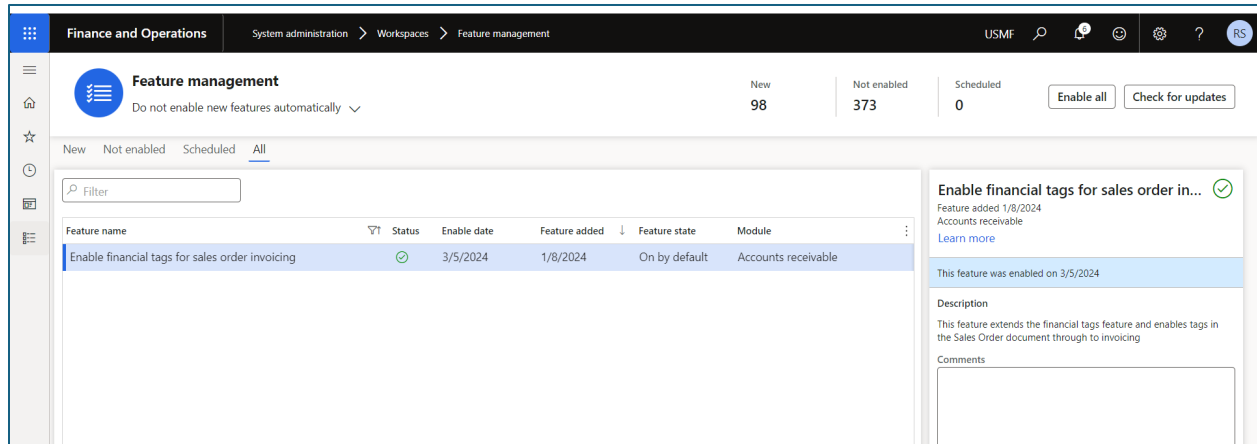

Comprehensive Guide

Introduction

The Financial tags (tags) feature eliminates the need to use document numbers, descriptions, or financial dimensions by letting an organization create and enter up to 20 user-defined fields on transactions. Those fields are then stored on the accounting entries that are created for the transactions. Tag values aren't stored in any subledger tables, the Customer transactions or Vendor transactions table.

following journals and transactions added support for tags:

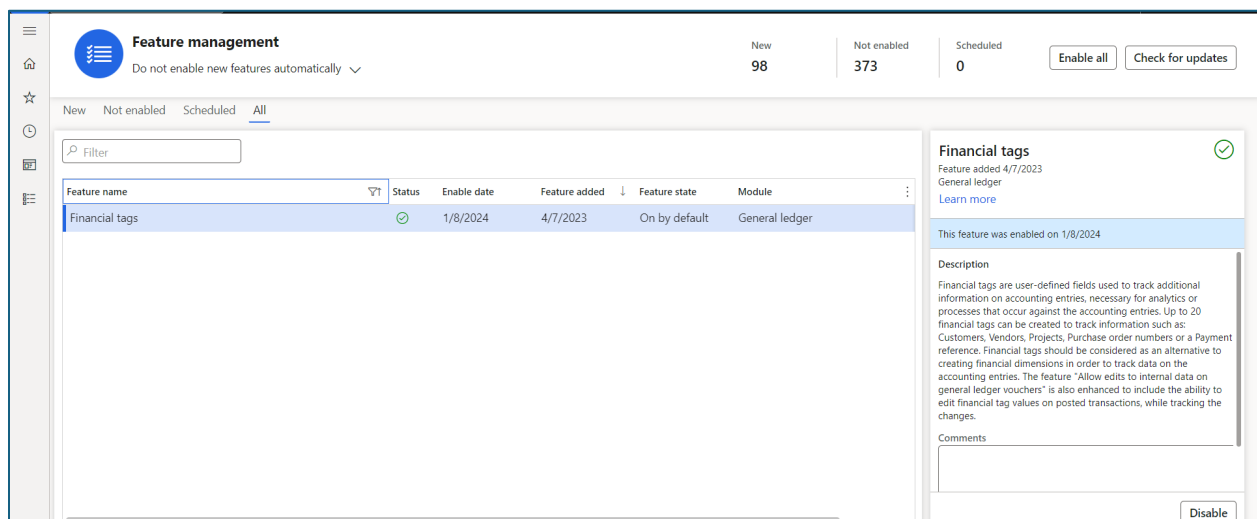

- General journal
- Global general journal
- Allocation journal
- Fixed asset journal
- All asset leasing journals
- Periodic journal
- Reporting currency adjustment journal
- Customer payment journal
- Vendor payment journal
- Invoice journal (vendor)
- Global invoice journal (vendor)
- Invoice register
- Sales order documents i.e. Sales order, packing slip and customer invoice. **(Note: To support financial tags available on sales order form, enable financial tags for sales order invoicing feature in Feature management.)**

Configuring Financial Tags

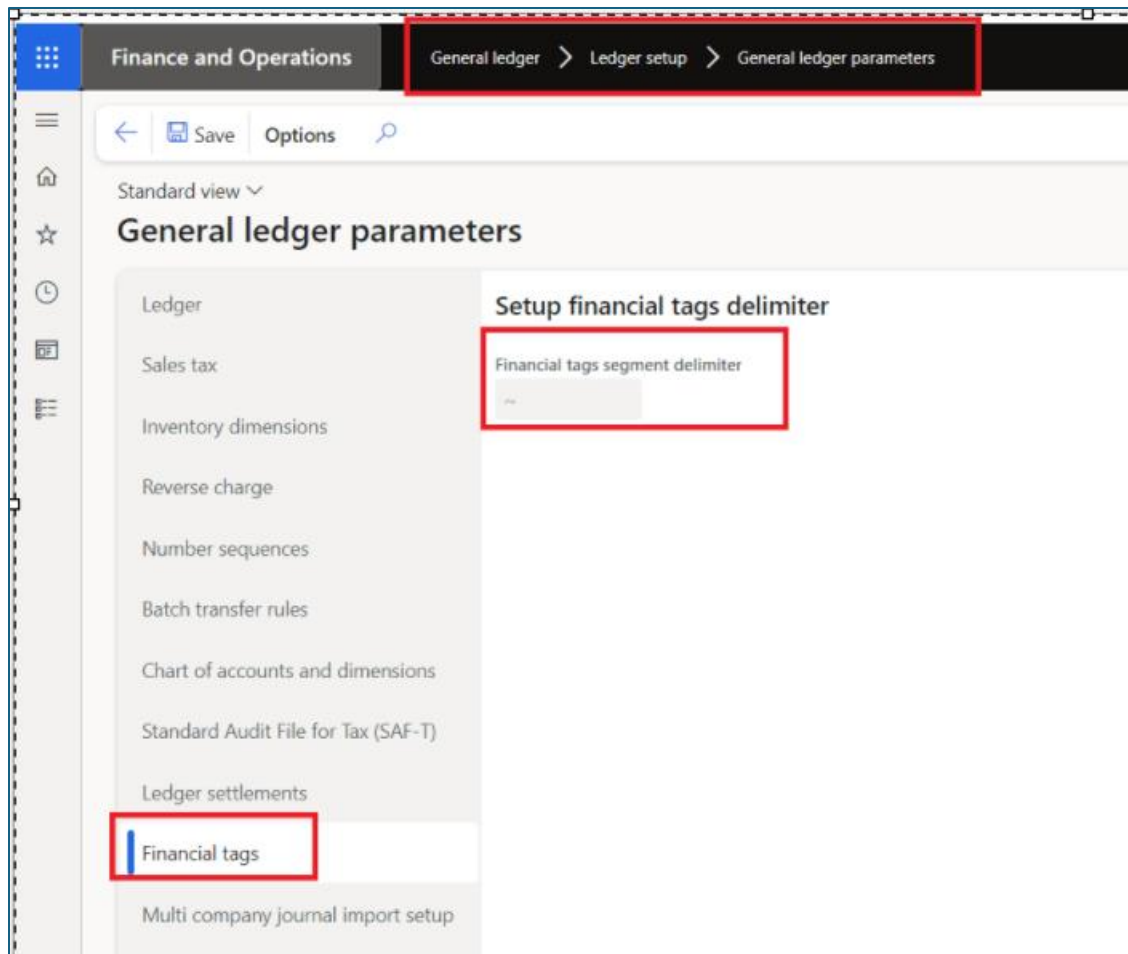

- Enable Financial Tags feature

Navigate to the System administration > Workspace > Feature management > All > search and enable “Financial tags” feature.

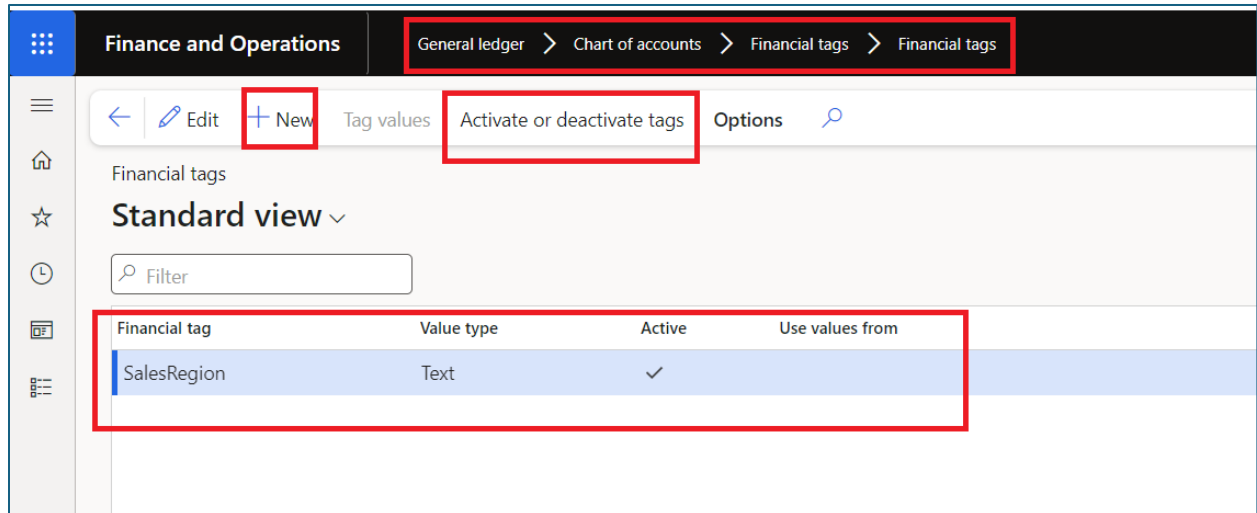

- Setup financial tags delimiter

1. Navigate to General Ledger > Ledger Set up > General Ledger Parameter > Financial tags tab > Financial tags segment delimiter.
2. Select Financial tags segment delimiter value.

- **Create New Financial Tag**

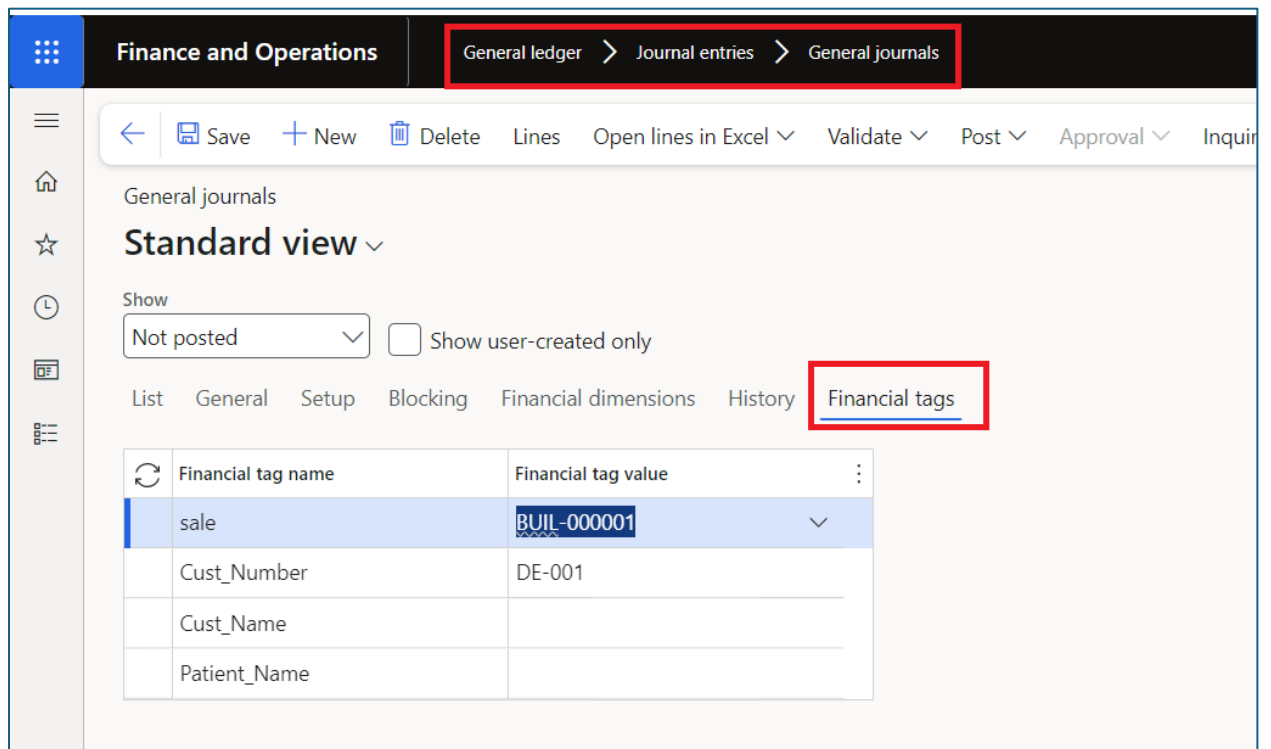

1. Navigate to General Ledger > Chart of Accounts > Financial Tags > Financial Tags
2. Click on New
3. Enter value in Financial Tag field.
4. In the Value type field, select Text, List, or Custom list.
5. If you selected List in the Value type field, select the value source in the Use values from field. The field contains a list of entities that the tag values can be selected from during transaction entry.
6. If you selected Custom list in the Value type field, select Tag values to create the custom list of tag values that will be available for selection during transaction entry.
7. Select Activate to activate the tag.

Apply Financial Tags

- Applying financial Tags on Journals

1. Navigate to General Ledger > Journal entries > General journals
2. Click on New button and create new journal
3. Click on Financial Tag tab and select financial tag for journal. (Note: Tag values that you add to the journal batch header are entered as default values on the account.)

- Users can also update or add financial tags to both the account and the offset account in Journal lines.

Conclusion

The process of applying and updating financial tags in the voucher transactions is essential for accurate financial reporting and record-keeping. By ensuring that all voucher transactions are

appropriately tagged, user can maintain the integrity and clarity of our financial data, facilitating more informed decision-making and compliance with regulatory requirements.
