

How to create ledger account alias in D365 F&O

A step-by-step guide for creating ledger account alias in D365 F&O

Introduction

A ledger alias is a short name that you can assign to a ledger account and financial dimension combination for easy reference. Ledger aliases can help you simplify data entry by using meaningful names instead of long account number and financial dimensions values.

Steps to create ledger account alias

- Go to General ledger > Chart of accounts > Ledger alias.
- Click New to create a new ledger alias.
- In the Ledger account alias field, type a value.
- In Type field select value i.e. Shared, User, User group
 - Shared: anyone can use the alias.
 - User group: I can select a user group, all that users can use the alias.
 - User: I can select the user that can use the alias.

The screenshot shows the 'Ledger account alias' form in D365 Finance and Operations. The form is titled 'Ledger account alias' and has a 'Type' dropdown menu with 'Shared' selected. The 'Administration' section includes 'Account structure' (Manufacturing B/S), 'Company' (USMF), 'Ledger account alias definition' (132100-001-023---007-), and 'Initial focus' (MainAccount). A red box highlights the 'Type' dropdown menu.

- In the Account structure field, select the structure the account and dimensions belong to.
- In the Company field, in the list, select the company that the alias applies to.
- In the Ledger account alias definition field, specify the account and dimensions. The account and dimensions will be populated when using the shortcut.
- In the Initial focus field, select the dimension that will have focus when the alias is used. After you type the shortcut, and the account and dimensions are populated, the Initial focus field is where the cursor or focus will move to.
