

Allow canceling partially invoiced purchase orders without using Deliver Remainder functionality

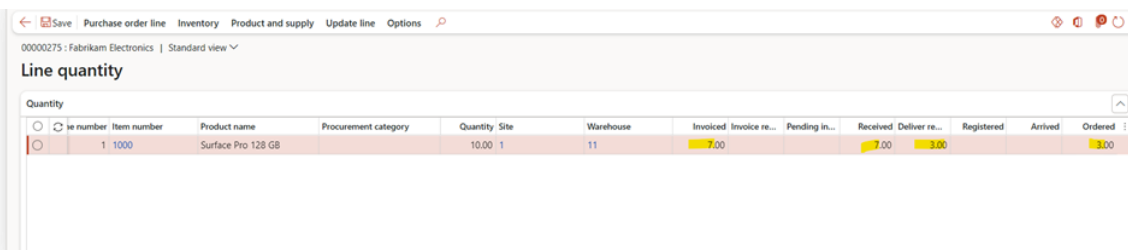

Suppose we have a Purchase Order with around 20 lines, and all lines have been partially received. After discussing with the vendor, it becomes clear that the vendor will not be able to fulfill the remaining order. As a result, you have no choice but to cancel the Purchase Order.

The standard method involves cancelling the delivery remainder for each line individually. However, let's explore how the new feature can streamline this process, especially when there are more than 30 such Purchase Orders for the same vendor.

Without enabling the feature:

1. Create a Purchase Order. (00000275)
2. Receive a partial qty and invoice it.

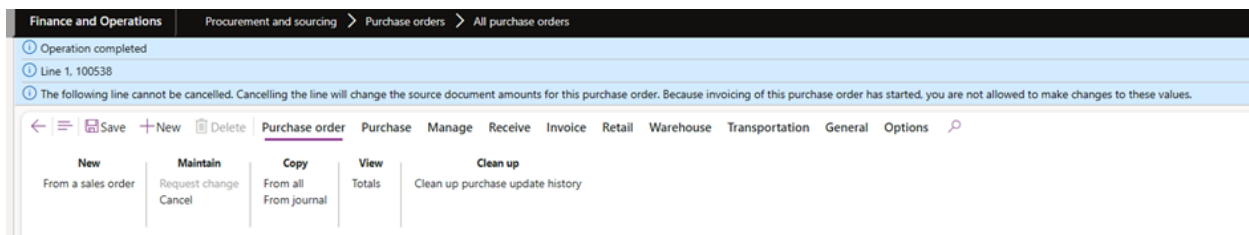

e.g. Purchase Order created for Qty 10 and 7 qty has been received and invoiced.

The screenshot shows a 'Line quantity' table for purchase order 00000275. The table has columns for Line number, Item number, Product name, Procurement category, Quantity, Site, Warehouse, Invoiced, Invoice re..., Pending in..., Received, Deliver re..., Registered, Arrived, and Ordered. The first line (Line 1) shows a quantity of 10.00, with 7.00 invoiced and 7.00 received.

Line number	Item number	Product name	Procurement category	Quantity	Site	Warehouse	Invoiced	Invoice re...	Pending in...	Received	Deliver re...	Registered	Arrived	Ordered
1	1000	Surface Pro 128 GB		10.00	1	11	7.00			7.00	3.00			3.00

When we try to cancel the Purchase order then we will get below error:

3. The usual way to cancel the remaining qty as Go to the Update line and cancel the deliver remainder.
