

VENDOR COLLABORATION IN D365

Dynamics 365

In **Dynamics 365 Finance and Operations (D365FO)**, the **Collaboration module** typically refers to **Vendor collaboration** or **Customer self-service** portals that enable external users (like vendors or customers) to interact with the system securely — without giving them full access to the internal ERP environment.

1. Vendor Collaboration Module

This is the most commonly used **collaboration** feature in D365FO.

✓ Purpose:

Allows **vendors** to:

- View and respond to **purchase orders**
- Confirm or reject **PO lines**
- View **invoices, payments, and delivery schedules**
- Submit **bids or quotations**
- Upload documents
- View performance KPIs (optional)

Key Features:

Feature	Description
PO Review & Confirmation	Vendor can see the PO issued and confirm/reject items.
Invoice Inquiry	Vendors can check the status of their invoices and payments.
RFQ Collaboration	Vendors can respond to RFQs directly.
Security Roles	Controlled access – Vendors only see what’s relevant to them.
Document Sharing	Ability to share contracts, spec sheets, etc.
