

Generate customer aging snapshot for collection agent in D365 F&O

A guide for Generate customer aged balances in Dynamics 365 Finance and Operations

Basic configuration

- **Aging period definitions**
 - An aging period definition defines the columns that appear on the Aged balances, Collections activities, and Collections cases list pages.
 - Go to Credit and collections > Setup > Aging period definitions

The screenshot shows the 'Aging period definitions' page in Dynamics 365 Finance and Operations. The breadcrumb trail is 'Credit and collections > Setup > Aging period definitions'. The page title is 'Aging period definitions'. Below the title, there is a table with two columns: 'Aging period definition' and 'Description'. The table contains one row: '30_60_90_120_PAST' with the description 'Past due 30, 60, 90, 120, 120+ d...'. Below this table, there is a section titled 'Periods' with a table of aging periods. The table has five columns: 'Period', 'Unit', 'Interval', 'Aging indicator', and 'Icon'. The '120+' period is highlighted. Below the table, there is a 'Printing direction' dropdown set to 'Backward'.

Aging period definition	Description
30_60_90_120_PAST	Past due 30, 60, 90, 120, 120+ d...

Period	Unit	Interval	Aging indicator	Icon
120+	-1	Unlimited	Red diamond	◆
91 - 120	-30	Day	Red X	✗
61 - 90	-30	Day	Red X	✗
31 - 60	-30	Day	Yellow exclamation point	!
1 - 30	-30	Day	Yellow triangle	▲
Current	0	Unlimited	Green check mark	✓

- **Customer Pool**
 - Customer pools are used to filter information on the Collections list page, related list pages, and aging snapshots. They can also be used to manage collections or aging processes for the grouped customer records.
 - Go to Credit and Collections> Setup > Customer pools

Finance and Operations Credit and collections > Setup > Customer pools

← Edit + New Delete Preview customer pool Options

AGE CUSTOMER BALANCES

Percentage of customers per batch task: 0.00

Processing of Aged customer balance

- **Age customer balances**

- Age Customer Balance is a periodic process that needs to be run at regular intervals to get an accurate 'Aging Snapshot' record for all customers or pools of customers.
- Go to Credit and collections > Periodic tasks > Age customer balances.
- Select an aging period definition, customer pool (If keep blank system will run for all customers), Criteria and Aging as of.
- Select legal entities as per requirements and click Ok button

☐ No

- Define criteria and click Ok button.
- **Aged Balances**
 - Aged Balances is a list page that views customer balances and aged amounts by aging period. You can drill down to the invoice level for each customer in the list.
 - Go to Credit and collections > Collections > Aged balances

Conclusion

Using Aged balance list page, collection agents can update the status of the outstanding invoices, write off invoices and updates on the conversations with customers.

Cheers

Hope this will help.
