

Modern Bank Reconciliation Overview in D365

1. Feature activation

Before proceeding, ensure that the feature is enabled in the Feature Management workspace.

2. Modern bank reconciliation

On by default as of version 10.43

Key Features:

- ✓ Enhanced bank reconciliation matching rules
- ✓ New user interface for the reconciliation worksheet
- ✓ Ability to create customer and vendor payment journals and settle open invoices directly from the bank reconciliation worksheet
- ✓ Clear D365 bank transactions without matching them to bank statement transactions
- ✓ Enable main account and offset account financial dimensions for general ledger voucher posting during bank account reconciliation
- ✓ Cancel payment journals from the bank reconciliation worksheet
- ✓ Reverse vouchers from the bank reconciliation worksheet

2.1 Enhanced bank reconciliation matching rules

- Generate customer payment
- Generate vendor payment
- Generate voucher
- Settle customer invoice

Finance and Operations Preview | Cash and bank management > Setup > Advanced bank reconciliation setup > Reconciliation matching rules

Standard view

Reconciliation matching rules

Matching rule: Match | Name: | Action: Generate vendor payment | Active: No

Step 1: Find statement lines to generate vendor payment

+ Add - Remove

Bank statement field | Operator: | Value: | We didn't find anything to show here.

Step 2: Vendor payment parameters

+ Add - Remove Financial details

Legal entity: USMF | Name: Contoso Entertainment System ...

2.2 Rule Set up for 'Generate Voucher'

Select the **Generate voucher** matching rule. Under **Voucher parameters**, click **Financial details**. A new slide out window opens, where we can enter the **Offset account number** and **Financial dimensions**.

2.3 New UI for Bank Reconciliation Worksheet

New user interface for the reconciliation worksheet

The screenshot displays the 'Bank reconciliation worksheet' interface. At the top, the breadcrumb trail shows 'Finance and Operations > Cash and bank management > Bank statement reconciliation > Bank statements'. Below this, a navigation bar includes 'Save', 'Run matching rules', 'Subtotal', 'Mark as reconciled', 'Mark as reconciled in batch', 'Print reconciliation statement', and 'Options'. The main header area shows 'Bank account overview' with a date of '11/19/2025' and currency 'USD' with a balance of '0.00'. The 'Unmatched transactions' tab is selected, showing a table of 'BANK STATEMENT TRANSACTIONS' with columns for 'Booking date', 'Debit', 'Credit', and 'Bank transaction co.'. The table lists several transactions for the date '10/06/2025'. To the right, the 'BANK TRANSACTIONS' section is empty, displaying a message 'We didn't find anything to show here.'.

Booking date	Debit	Credit	Bank transaction co.
10/06/2025	7,082.42	115	
10/06/2025	113.00	169	
10/06/2025	120.00	169	
10/06/2025	149.00	169	
10/06/2025	150.00	169	
10/06/2025	249.42	169	
10/06/2025	615.00	169	
10/06/2025	616.75	169	

Ability to create customer and vendor payment journals and settle open invoices directly from the bank reconciliation worksheet, generate GL-only vouchers, and manually match transactions, as shown in the screen below.

This screenshot is identical to the one above but includes three blue callout boxes with arrows pointing to specific UI elements: 'Manually match transactions' points to the 'Match' button; 'Create cust/vend payment journal (and settle open invoices)' points to the 'Generate payment journal' button; and 'Generate GL only voucher' points to the 'Generate voucher' button. The rest of the interface remains the same.

• **Generate payment journal**
