

Supplementary Items in Dynamics 365 FinOps

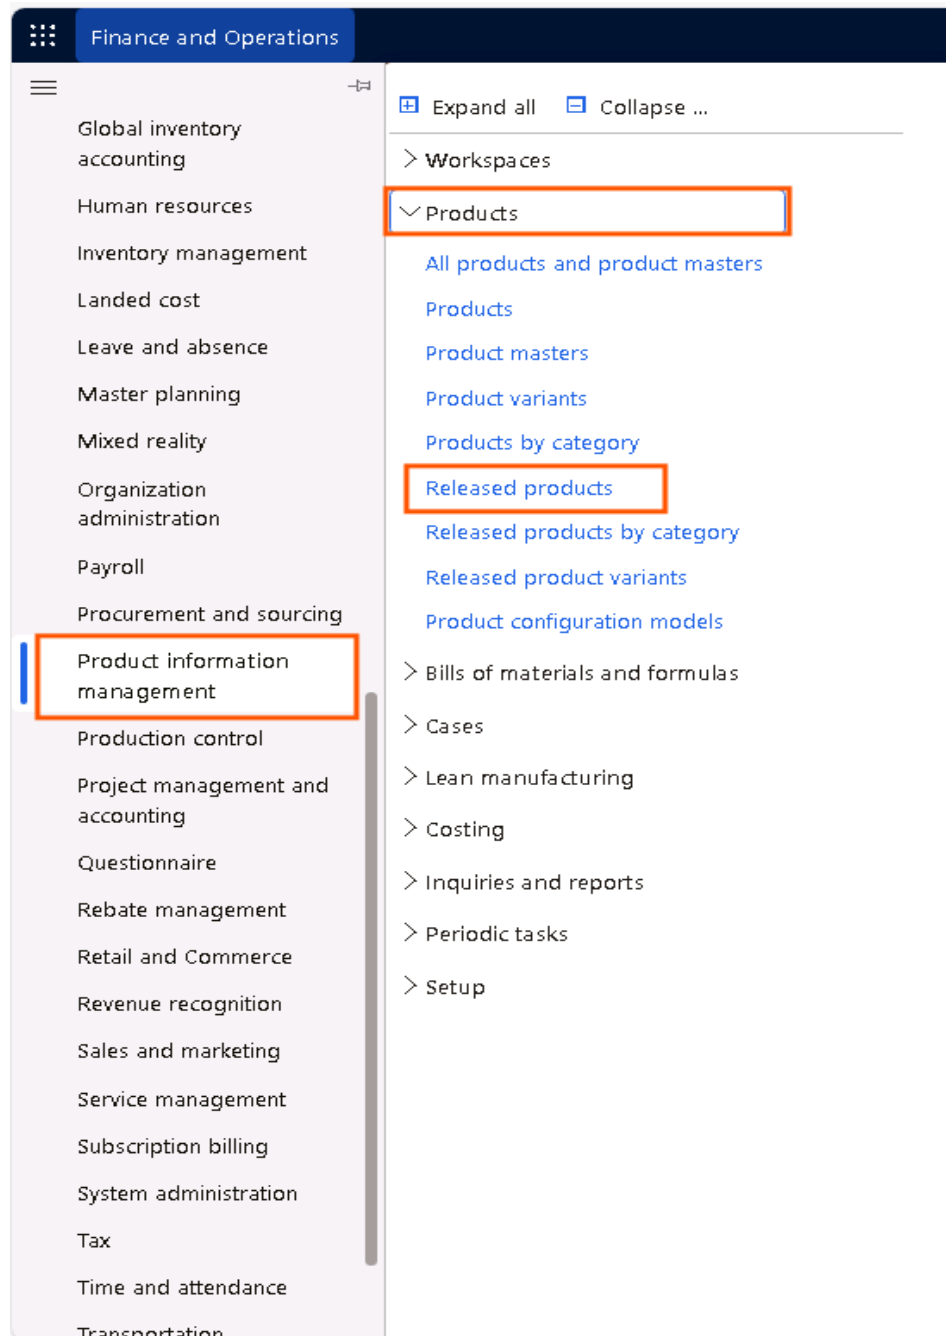

FUNCTIONAL DESIGN DOCUMENT

Krishna M

Version	Date	Modified By	Changes
1	20 June 2025	Krishna M	Add

What are Supplementary Items in Dynamics 365:

1. In Dynamics 365 Supply Chain Management, supplementary items are additional items that are automatically added to sales or purchase orders based on specific rules and quantities of a main item.
2. These items can be configured to be **free of charge** or at **a cost**, and they can be linked to specific customers, customer groups, or all customers.
3. Supplementary items enhance the **sales** or **purchasing process** by offering related **products** or **bonuses** without requiring manual addition.
4. Let's create a supplementary Item to a main Item.
5. Go to "Product Information management" -> Products -> Released Products -> New. Provide the required information.

Creating a Product in the “Released Products” menu.

C0001	Microsoft Natural Keyboa...	Microsoft Natural ...	Item	Product master	Not specified	Color		

The below screen shows up and give the related information.

- 1. **Account Code:** whether this supplementary item(s) is applicable to All, Group or a particular Vendor (in case of Purchase Order).
- 2. **Quantity limit:** For Every 1, quantity limit, 1 supplementary Item should be applicable. (another example, for every 10 products of “Surface pro 128 GB”, vendor will give 1 (One) “surface pro 128 GB” free of charge.
- 3. **Supplementary Item:** is the item which will be an item that should be added for main item.
- 4. **Supplementary Quantity:** is the quantity(s), that will be given by Vendor free of charge or on cost basis, in this example.
- 5. **Multiple Quantity:** For Example, if we purchase 10 “Surface pro 128 GB” and Vendor gives one “Surface pro 128 GB” free of cost. Then this feature will be helpful, we need to give 10 in this field for this scenario.
