Steps for Reviewing Transfer Order created through the Mobile Warehouse App in D365:

Step-1. Batch Jobs will run automatically to process the information added through the Mobile Warehouse App.

Step-2. To create and ship the transfer order for the transfer order added through Mobile Warehouse App, 3 batch jobs will run **“Process warehouse app events”, “Automatic release of transfer orders”, and “Process outbound shipments”**.

Step-3. Once the first batch job is completed the transfer order will be created in the D365 Dev Environment.

Step-4. To see the Transfer order, navigate to **“Modules> Inventory Management>Inbound Orders> Transfer Order”** and select the transfer order **“ITfr00000074”** which was created in the Mobile Warehouse App.

Figure 9 Reviewing transfer order was created or not.

Step-5. Transfer order line has been added and the Item ID “SS-C”, quantity “1” and unit “t” has been added to it.

The screenshot displays the SAP Transfer Order (ITF00000074) interface. The top navigation bar includes 'Finance and Operations', 'Inventory Management', 'Inbound orders', and 'Transfer order'. The main header shows the transfer order number 'ITF00000074' and a 'Created' status. Below the header, the 'Transfer order lines' section is visible, containing a table with one line item. The line item details are as follows:

Item ID	Quantity	From warehouse	To warehouse	Ship date	Receipt date	Product name	Transfer status
SS-C	1.00	10-04-2024	10-04-2024	10-04-2024	10-04-2024	Silver Concentrate 6	Created

Figure 10 Transfer order created

Step-6. After all the 3 batch jobs are completed, the transfer order status will change to “Shipped”.

Figure 11 Transfer order shipped

Steps for Receiving a Product through Mobile Warehouse App:

- Step-1. Log in to the Warehouse management mobile app using user-id "111" and password "1".
- Step-2. Open the “**Inbound menu**”.

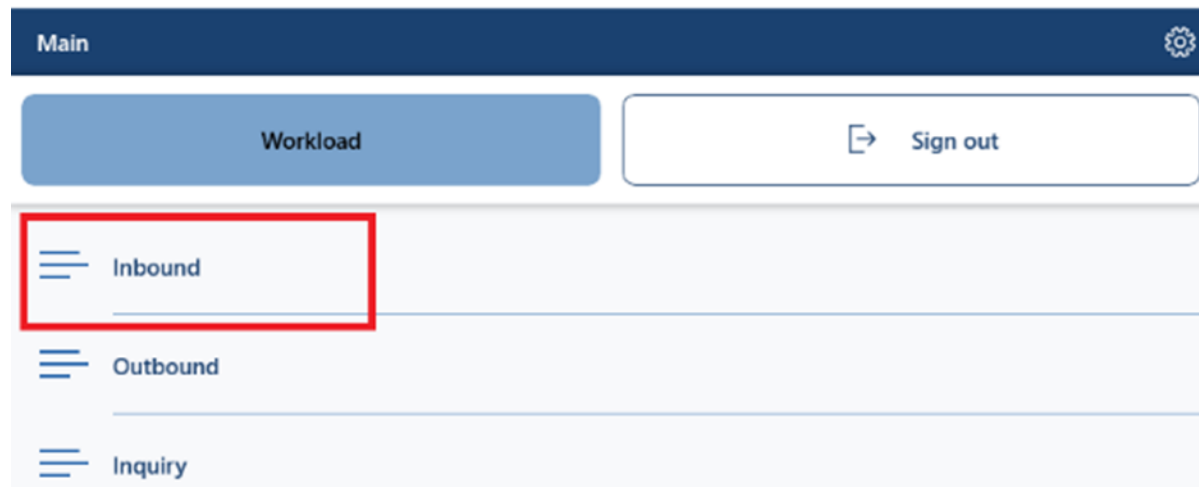

Figure 12 Inbound menu.

- Step-3. Open the “**Transfer receive LP**” menu item.
