

Power BI Configuration

How we can configure the built-in power BI functionality in D365 FnO

This functionality requires a one-time configuration of your environment. An administrator must do this step to enable Microsoft Power BI to communicate and authenticate correctly

Registration process

- Sign in to <https://portal.azure.com/> using an Azure tenant admin account.
- Go to **Microsoft Entra** > **App registrations** > **New application registration**.
- Enter the following values:
 - **Name** – Enter the name of your app.
 - **Supported account types** – Enter only accounts that are directly in this organization (single tenant).
 - **Application type** – Enter **Web**.
 - **Redirect URI** – Enter the base URL of your client with **oauth** appended to the end, such as **https:environment URL/oauth**.
- Select **Register**.
- Copy the **Application (client) ID** value. You will use this value to connect to the PowerBI.com service.
-

Microsoft Azure

Search resources, services, and docs (G+)

Home > App registrations >

Register an application

* Name

The user-facing display name for this application (this can be changed later).

Production_D365_FO_Power BI

Supported account types

Who can use this application or access this API

☒ Accounts in this organizational directory only (الجهة المستثمر العقاري) - Single tenant)

☐ Accounts in any organizational directory (Any Microsoft Entra ID tenant - Multitenant)

☐ Accounts in any organizational directory (Any Microsoft Entra ID tenant - Multitenant) and personal Microsoft accounts (e.g. Skype, Xbox)

☐ Personal Microsoft accounts only

[Help me choose...](#)

Redirect URI (optional)

We'll return the authentication response to this URI after successfully authenticating the user. Providing this now is optional and it can be changed later, but a value is required for most authentication scenarios.

Select a platform

e.g. https://example.com/auth

By proceeding, you agree to the Microsoft Platform Policies

Register

Select **Manage** > **API permissions** > **Add a permission** > **Microsoft APIs** > **Power BI Service**.

Granting tenant-wide consent may revoke permissions that have already been granted tenant-wide for that application. Permissions that users have already granted on their own behalf aren't affected. [Learn more](#)

The "Admin consent required" column shows the default value for an organization. However, user consent can be customized per permission, user, or app. This column may not reflect the value in your organization, or in organizations where this app will be used. [Learn more](#)

Configured permissions

Applications are authorized to call APIs when they are granted permissions by users/admins as part of the consent process. The list of configured permissions should include all the permissions the application needs. [Learn more about permissions and consent](#)

+ Add a permission

Grant admin consent for الاستثمار العقاري و التطوير للشركة

API / Permissions name	Type	Description	Admin consent required	Status
Microsoft Graph (1)				...
User.Read	Delegated	Sign in and read user profile	No	...

To view and manage consented permissions for individual apps, as well as your tenant's consent settings, try [Enterprise applications](#).

Request API permissions

Integrate your application with the Azure portal

Store and retrieve data from semi-structured data

Connect your application to Office 365 and Exchange systems

Dynamics ERP
Programmatic access to Dynamics ERP data

Intune
Programmatic access to Intune data

Office 365 Management APIs
Retrieve information about user, admin, system, and policy actions and events from Office 365 and Microsoft Entra ID activity logs

OneNote
Create and manage notes, lists, pictures, files, and more in OneNote notebooks

Power Automate
Embed flow templates and manage flows

Power BI Service
Programmatic access to Dashboard resources such as Datasets, Tables, and Rows in Power BI

SharePoint
Interact remotely with SharePoint data

Skype for Business
Integrate real-time presence, secure messaging, calling, and conference capabilities

Yammer
Access resources in the Yammer web interface (e.g. messages, users, groups etc.)

More Microsoft APIs

Azure Batch
Schedule large-scale parallel and HPC applications in the cloud

Azure Communication Services
Rich communication experiences with the same secure CPaaS platform used

Azure Cosmos DB
Fast NoSQL database with open APIs for any scale.

1. Select **Delegated permissions**.

Request API permissions

< All APIs

 Power BI Service
<https://analysis.windows.net/powerbi/api/> Docs

What type of permissions does your application require?

Delegated permissions
 Your application needs to access the API as the signed-in user.

Application permissions
 Your application runs as a background service or daemon without a signed-in user.

> SparkJobDefinition

> SQLDatabase

> SQLEndpoint

> StorageAccount

Add permissions
Discard

- After enable all above permission You must grant admin consent for the permissions to allow reports to be published to Power BI. By pressing **Add Permissions** Button
- Select **Manage > Certificates & secrets**.
- In the **Client secrets** field, select **New client secret**.
- Enter a value in the **Description** and **Expires** fields, and then select **Add**.
- Make a note of the **Application ID** and **Secret Value** values. You will use these values in the next procedure.

Credentials enable confidential applications to identify themselves to the authentication service when receiving tokens at a web addressable location (using an HTTPS scheme). For a higher level of assurance, we recommend using a certificate (instead of a client secret) as a credential.

Application registration certificates, secrets and federated credentials can be found in the tabs below.

Certificates (0)
Client secrets (0)
Federated credentials (0)

A secret string that the application uses to prove its identity when requesting a token. Also can be referred to as application password.

Specify Power BI settings in D365 Finance and Operations

The screenshot shows the 'PowerBI.com configuration' page within the 'Finance and Operations' system. The breadcrumb trail at the top indicates the path: 'System administration > Setup > PowerBI.com configuration'. Below the breadcrumb, there are navigation options: a back arrow, 'Edit' (highlighted with a red pencil icon), and 'Options' (with a magnifying glass icon). The main heading is 'PowerBI.com configuration'. Under the 'Settings' section, there are three items: 'Enable PowerBI.com integration' with a toggle switch set to 'Yes', 'Application ID' with a blue text input field, and 'Application key' with a blue text input field. Below these is 'Apply company filter' with a toggle switch set to 'Yes'. Under the 'Links' section, there are two categories: 'APP LINKS' with a link 'Deploy Power BI files', and 'EXTERNAL LINKS' with two links: 'Azure Service Portal' and 'Dynamics Lifecycle Services'. The 'Dynamics Lifecycle Services' link is highlighted with a red rectangular box.

- Select **Edit**.
- Set the **Enabled** option to **Yes**.
- In the **Application ID** field, enter the **Application ID** value that you got from Power BI in the previous procedure.
- In the **Application key** field, enter the **Secret Value** value that you captured in Microsoft Entra ID in the previous procedure.
- Select **Save**.
- Click on the Dynamics Lifecycle Services

If you're starting Power BI from the application for the first time, you're prompted to authorize sign-in to Power BI from the client. Select **Click here to provide authorization to Power BI**.

To validate the PowerBI.com configuration, select **Get started**.

This application is not published by Microsoft.

This app would like to:

- ✓ View all workspaces
- ✓ Create content
- ✓ Read and write all datasets
- ✓ View all datasets
- ✓ View all dashboards
- ✓ Make API calls that require read permissions on all reports
- ✓ Sign in and read user profile
- ☒ Consent on behalf of your organization

If you accept, this app will get access to the specified resources for all users in your organization. No one else will be prompted to review these permissions.

Accepting these permissions means that you allow this app to use your data as specified in their terms of service and privacy statement. You can change these permissions at <https://myapps.microsoft.com>. [Show details](#)

Does this app look suspicious? [Report it here](#)

Cancel

Accept

Once the Authentication is completed successfully then you need to refresh the entity stores for populating data on Dashboard,

Note: financial data will not populate until unless complete the following prerequisite

1. Attached proper account categories with main account
2. Account type should be select proper like Assets, Liabilities, Equities, Revenue and Expenses instead of Balances Sheet and PNL
