

Create new workspace in D365 F&O

A guide for setting up and managing new workspace in Dynamics 365 Finance and Operations

Introduction

In Microsoft Dynamics 365 F&O, a workspace is a personalized area designed to streamline and enhance the user experience by providing quick access to tasks, information, and data relevant to specific roles or responsibilities. Workspaces are designed to improve productivity by consolidating various functionalities and data points into a single, user-friendly interface.

D365 F&O provides various default workspaces that can be customized. Additionally, users have the option to create new, personalized workspaces.

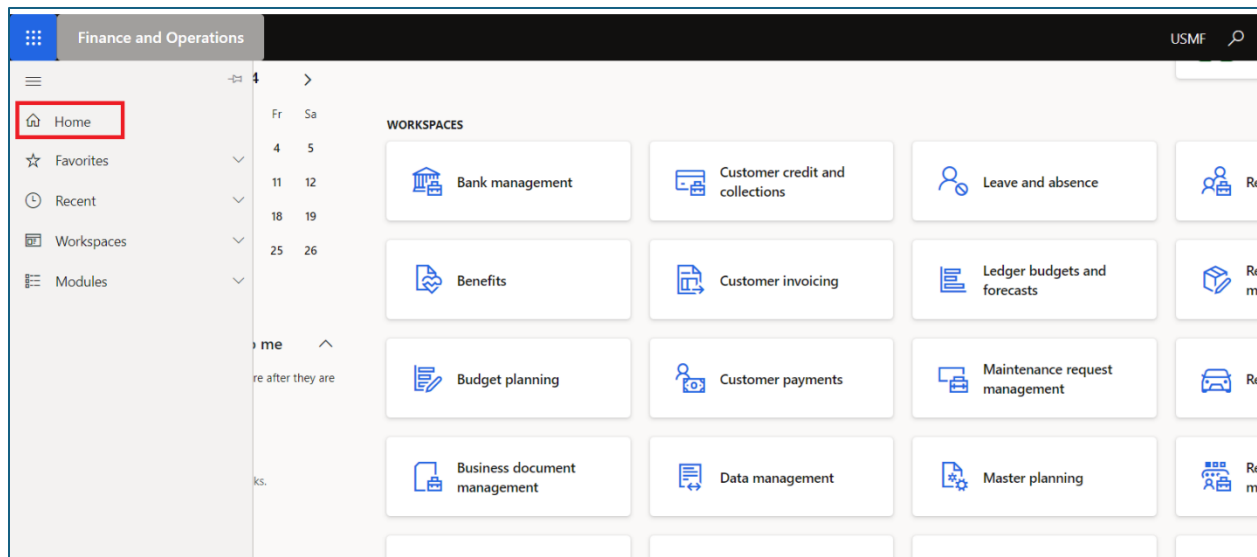

Key Characteristics of Workspaces

- **Role-based:** Workspaces are tailored to meet the specific needs of different roles within an organization. Whether you are in finance, human resources, sales, or any other department, your workspace will provide tools and information pertinent to your job function.
- **Interactive:** Workspaces are designed to be interactive, allowing users to perform tasks, view data, and access information without navigating away from the workspace.
- **Customizable:** Users can customize their workspaces to include the data, reports, and tasks that are most relevant to them, enhancing efficiency and productivity.
- **Integrated:** Workspaces integrate seamlessly with other D365 F&O modules and external systems, providing a holistic view of business operations.

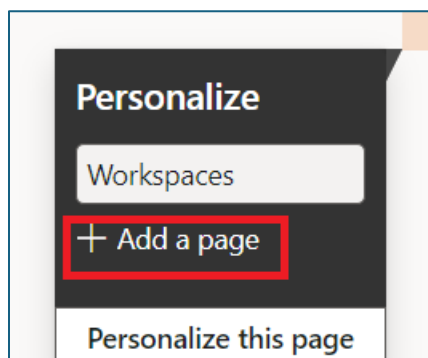

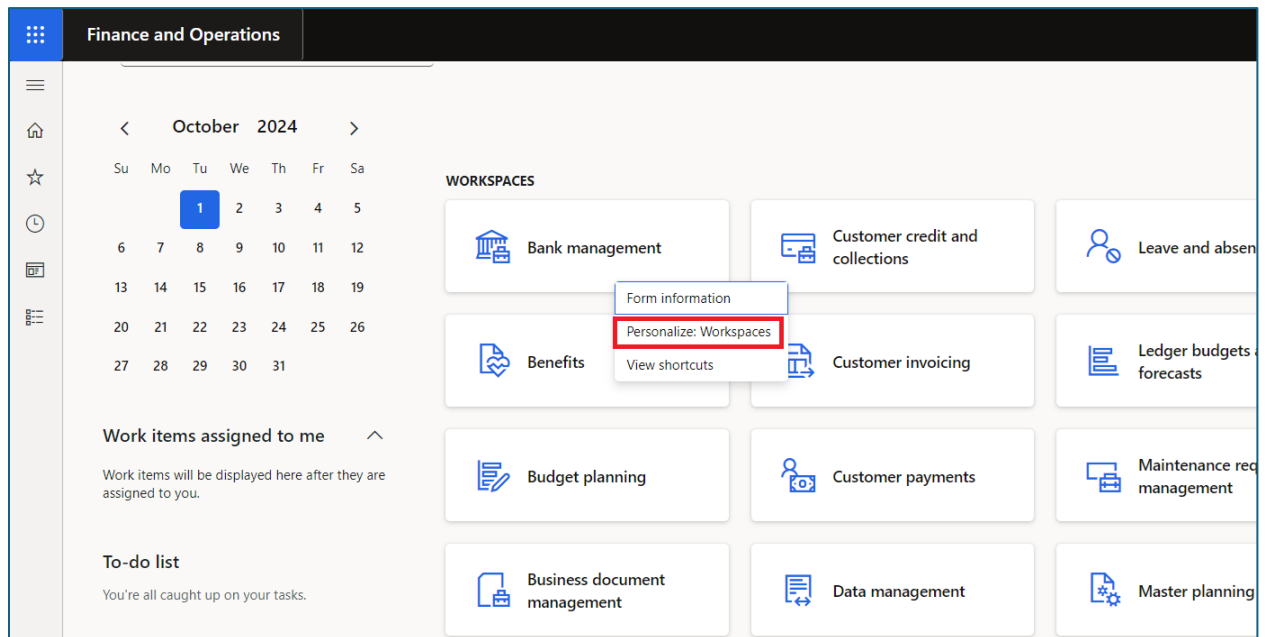

Step by step guide to Create and Customize Workspaces

Creating and customizing workspaces in D365 is a straightforward process that allows users to tailor their workspaces to meet their specific needs. Here is a step-by-step guide:

- Log in to D365 F&O and go to “Home” screen and right click in the ‘workspace area’ and click Personalize > Add page.

- Click Add a Workspace > add new workspace name and click on Ok button.

Add a page

Add a workspace

Name

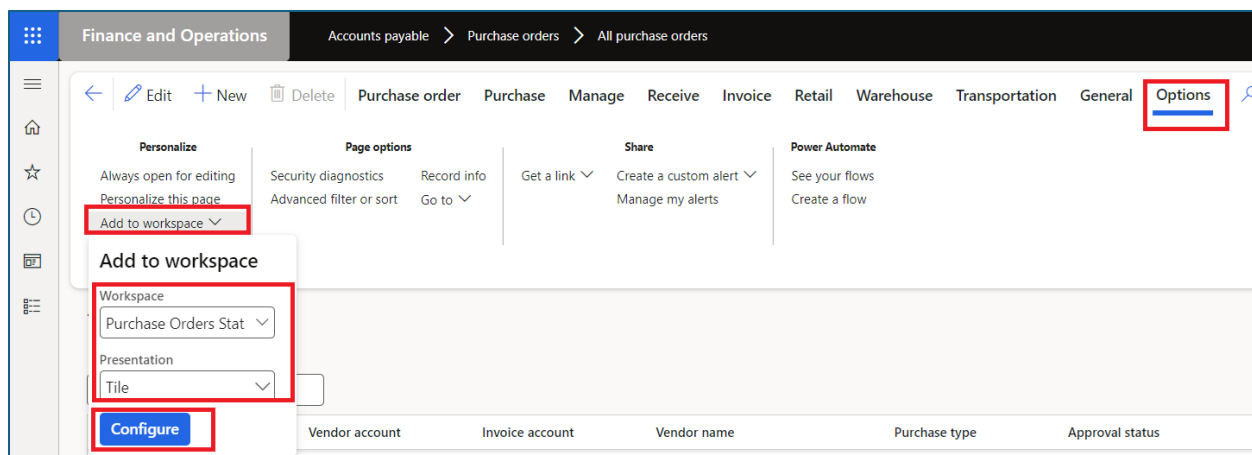

Purchase Orders Stat

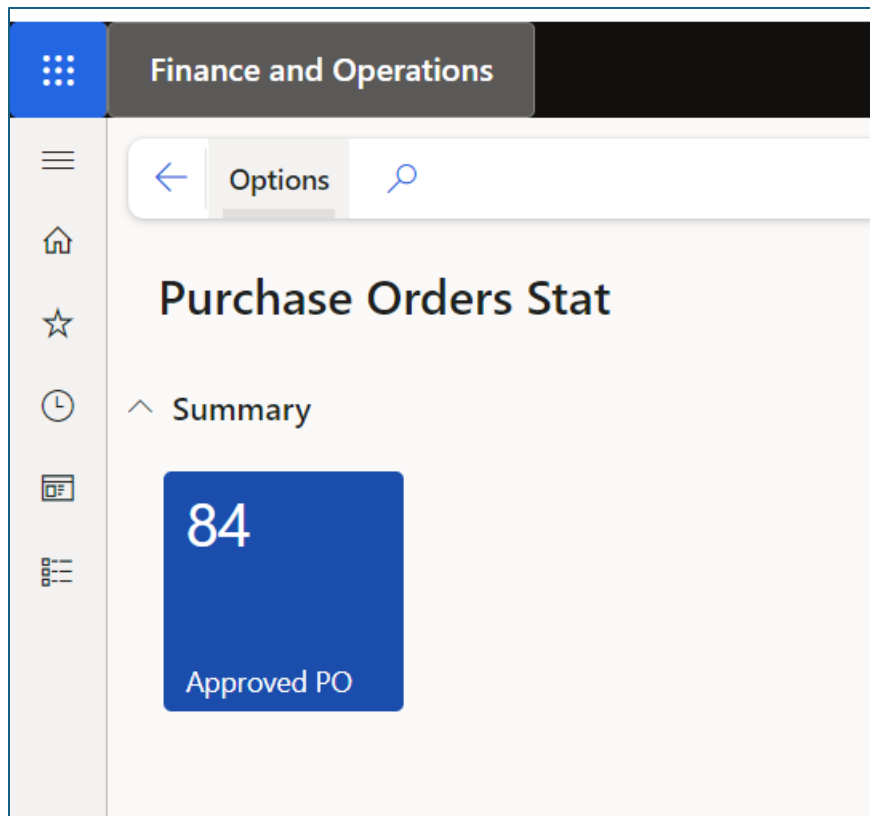

OK Cancel

- Check workspace is created and Now you can add content to the workspace.

- Navigate to the grid that you want to add to the workspace. For this example, we are going to add the Approved Purchase order to the Custom Workspace.
- Navigate to Accounts payable > Purchase Orders > All Purchase Orders.
- Click on the Options Button in action pane. In the personalize section, click Add to Workspace.
- Select newly created workspace.
- Select Presentation and click on Configure.
- Note: Before adding into workspace, in PO form add filter i.e. approval status = Approved and save that view as my view.

Note

- User need to prefilter data before to add in workspace E.g. in above example if user wants to show only approved PO then user needs to add filter approval status = Approved and save that view.
- There are three presentation options are available in workspace i.e. Tile, List and Link.
 - **Tile:** When selecting the Tile option, a window will pop up and user can change the name that appears on the Tile, and specify whether or not you want to show the count on the tile and Click Ok. The Tile will appear in the workspace.

Conclusion

Workspaces in Microsoft Dynamics 365 are powerful tools that enhance productivity, improve decision-making, and streamline collaboration. By understanding the different types of workspaces and how to create and customize them, users can leverage these tools to drive business success. Whether you are managing day-to-day operations, analyzing data, or collaborating with your team, workspaces provide a personalized and efficient way to access the information and tools you need.

Cheers

Hope this will help.
