2 Introduction:

2.1 Company's Background/Process Overview (Optional):

- Write a paragraph introducing the company, explaining what it does, and describing its main business goals

2.2 Objectives:

- After detailing the business requirement, the next section will highlight the specific business process that this document aims to address

3 Purpose of Document:

- This document aims to develop thorough test cases for the “**Name of Module**” to document the “**Name of Process**” while implementing a customized tracking feature tailored to the client's needs in the D365 environment.

3.1 Criteria:

- Compilation of functional and non-functional requirements that satisfy the criteria for creating a functional solution

3.2 Summary:

- Summary in one paragraph about the whole document what is going to be achieved

3.3 Audience (Optional):

- Include a list of stakeholders which are:

1. Project Sponsor.
2. Project Manager.
3. Process Owner

4 Assumptions & Dependencies:

4.1 Assumptions:

- Outline the key assumptions made during the project's development (assumptions and dependencies are within the process).

4.2 Prerequisites:

- Write down in detail the prerequisites required before proceeding with the project.

4.3 Dependencies:

- Write down security rules for users and what things

5 Project Estimation:

- Include a table highlighting the timelines for the functional and development teams.

Category of work	Estimated No of Hours to complete the work
Functional Resource	----- (Hours)
Technical Resource	----- (Hours)
Total Estimated Hours:	----- (Hours)

6 Current vendor invoice process (AS-IS):

- This section involves the current “As-Is” process in D365 which outlines the existing workflows and operations before any modifications or enhancements are implemented
- Include As-Is flow chart.

6.1 Process Flow Mapping (As-Is):

- Include a process flow map for the As-Is process.

6.2 Post a vendor invoice journal with VI-line errors (As-Is):

- Write a short detail about the process in a few sentences

6.2.1 Steps for Microsoft Dynamics D365:

- Include all navigations with parametrization including screenshots to perform this process (below is an example)

Step-1. Navigate to “Accounts Payable> Invoices > Invoice journals”. The “Vendor invoice journal form” will be opened.

Figure 1 Navigation for Invoice Journal

6.3 Post a vendor invoice journal with COVI and CFO line errors (As-Is):

- Write a short detail about the process in a few sentences

6.3.1 Steps for Microsoft Dynamics D365:

Step-1. In the “**Vendor Invoice Journal lines form**”, add a second line without “**Approved**” and “**Approved by**” data, with the following info:

- A. **Account:** 001071
- B. **Account Name:** BARCEL USA
- C. **Invoice Date:** 3/12/2024
- D. **Invoice:** T8
- E. **Credit:** 30,000
- F. **Currency:** USD
- G. **Approved:** No
- H. **Approved by:** (blank)
- I. **Offset Account Type:** Ledger
- J. **Offset Account:** 70500-404—

Figure 2 Vendor Invoice Form

6.4 Vendor Invoice with COVI and CFO lines creating a blank journal deletion after posting (As-Is):

- Write a short detail about the process in a few sentences

6.4.1 Steps for Microsoft Dynamics D365:

Step-1. Navigate to “**Accounts Payable> Invoices > Invoice journals**”. The invoice journal form will be opened.

Figure 3 Vendor Invoice Journal Navigation

6.5 Post a vendor invoice journal with No errors for VI Journal & threshold journal lines (As-Is):

- Write a short detail about the process in a few sentences

6.5.1 Steps for Microsoft Dynamics D365:

Step-1. Click “**New**” at the Action Pane.

Step-2. A new Journal batch number, “**GJ0020771**,” is created. Select a Name, “**VI**,” and Enter a Description, “**Vendor Invoice Blank Journal Test.**”

Figure 8 Adding details to the journal

7.4.2 Customized fields definition:

- Place a Custom field table

Sr.#	Field Name	Location	Purpose	Condition
1.	Write Field Name	Write form Name	Write the purpose of this customization	Mention the condition

7.5 Summary (To-Be):

- Write in bullet form about how the To-Be process improves the situation
- For reference “Streamlines project creation, enabling efficient multi-tasking, reducing manual effort, and minimizing errors for improved user experience”

8 Field Mapping Table:

- Include Field Mapping table

Sr.#	Section	Label	Field	Mapping	Location	Purpose	Condition
1.	Include Section detail	Add labels	Include field names	Include mapping			Add conditions

9 Annexure A:

9.1 Mockups:

- Include Mockups (if applicable) for the ease of the reader and developer.

9.1.1 Mockup: Task I - Add a check box and one numerical field to activate Set default shipment link

- Field Name: Set default shipment limit
- Add one numerical field and check box to set a default value
- Numerical field should only be editable if the check box is activated

The mockup shows the 'Accounts receivable parameters' screen for 'Swedish Match'. The left sidebar lists various parameters: Credit rating, Prices, Electronic documents, Inventory dimensions, Rebate program, Margin alerts, Number sequences, Warehouse management, and Swedish Match (highlighted). The main content area is titled 'Setup options for Swedish Match' and contains a 'Sales order default values' section with a dropdown arrow. Below this, the 'Set default shipment limit' option is shown with a toggle switch set to 'Yes' and an adjacent numerical input field. Red annotations with arrows point to specific elements: 'Create Header' points to the 'Setup options for Swedish Match' title; 'Create this checkbox and numerical field' points to the 'Set default shipment limit' toggle and input field; 'Dropdown menu Tab' points to the dropdown arrow in the 'Sales order default values' section.

10 Annexure B:

10.1 Test Case 1: VI Journal for all the Lines having No Error for the Amount Less than \$5000 and Errors for Above \$5000:

- Include test cases for validation purposes as the image passed below:

Sr.	Process Step Description	Expected Results for Proposed Solution
1.		

10.2 Document Summary:

- Add an overall summary like this “This document outlines a proposed solution to improve efficiency and user experience by optimizing processes and enhancing validation mechanisms.”

11 Acceptance (Optional):

11.1 Document Acceptance:

- The “**Company**” will confirm that the functional design document meets their requirements and consent to move forward with the development

11.2 Accepted by & Date:

- Accepted By: “**Name of the person who accepted it**”
- Accepted Date: “**Mention Date**”

12 Appendices:

12.1 Questions for the TO-BE process:

- Include all possible questions related to the TO-BE process

12.2 Responses to Functional Design Doc:

- Add responses from clients to the functional document
